

ENVY BUILT-IN

Chub's new Vizor is our highest spec bivvy to date. A rock solid 16mm frame built from 6061 lightweight Aluminium. Breathable Climatex® skin with a 10,000mm hydrostatic head. A rigid, built-in storm peak and a Back Draft ventilation system which you can adjust or completely zip off to suit the conditions. So it's decision time. Are you going to own one – or just be jealous of the bloke that does?
