

CHUB GAS CANISTER SLEEVE

RRP: £5.99 www.chubfishing.com

This is a simple but ingenious sleeve that provides two vital functions. The first is that it will stop the gas from freezing up in winter. When this happens, it's usually just when you really need a brew! The second is that

due to its construction, it can house the type of gas stove where the burner fits on top. A useful little item that makes winter fishing that bit easier!
